

“TOP 10 RULES FOR GETTING RICH AS AN ONLINE ENTREPRENEUR”

Prospria™ home based business opportunity
Learn more at our website: <https://www.prospria.com>

You've already probably heard all those very old school ideas for building wealth, like paying yourself first, the power of compound interest, being a penny pincher, spending less than you make, and the list goes on and on. And those are all valid statements.

However, this list focuses more on the key things you need to consider as an online entrepreneur.

RULE #1: Build a Team. Super important. Because you need to leverage other peoples time and energy.

RULE #2: Own income producing assets. Such as your own home based business. Ideally something that runs on it's own, automatically, making sales 24/7/365. Extremely important.

RULE #3: Find something to sell that's considered “high ticket”. High ticket, which means it sells for larger amounts; and that earns you at least \$1000 usd per sale in net profit (or more). Often people make the mistake of selling things that really don't earn them hardly anything at all. This can be a mistake as each profit you make is too small, it simply won't add up to much. You have to end up doing way too much quantity, and it simply take far too long to get anywhere. Rather keep your eye out for high ticket opportunities, as it will take far fewer sales to get ahead. ie: Math: just 100 sales x \$1000 net profit =\$100,000. Because the other factor to this is often each sale is going to demand some of your time. And there's simply not enough hours in a day to end up wasting it on tiny profits. Major important.

RULE #4: Find a rising star. Find a business or person that's going places fast, and get in with them early. This has been how a lot of people have quickly risen to the top.

RULE #5: Work for yourself. A 9 to 5 job will always get in the way of getting rich because it eats up all your time and energy. You might not be able to quit your job overnight. It will take some time. But gradually aim toward becoming self employed full time. Many have done it, you can too.

RULE #6: Invest wisely. You need to put your money to work for you. Rather than just leave it in a bank account or low yield investment. Put it into something that has the potential to grow exponentially. That can be a business, not just investments. Some people will foolishly leave thousands of dollars in a bank account at virtually 0% interest. But invested wisely into the right business opportunity, those funds could quickly grow exponential. So don't be afraid to put your money to work for you, rather than just leaving it to collect dust.

RULE #7: Be patient and persistent. It often can a lot longer than you might anticipate to start to see the results you want. So be willing to practice delayed gratification. Also by expanding your time frame a bit when it comes to building a business you'll be giving yourself that breathing room and be under less pressure and stress. Rome wasn't built in a day right. But if you're consistently working on it, it will get done.

RULE #8: The riskiest thing you can do is take no risk. No risk no rewards. And don't be afraid of failure. If you're not failing at times, then you're probably not achieving very much.

RULE #9: Don't listen to people that aren't already millionaires or billionaires. There's all kinds of well meaning friends, family and other people you know, that are going to offer up their opinions. But unless they're extremely wealthy you need to really take that advice with a grain of salt. Mainly because they're not an entrepreneur like you are. They're not trying to get ahead in life. Or have a very poor concept of the fundamentals of success. And that bad advice and slow you down or even rob you of your dreams and goals in life. So be careful when listening to others.

RULE #10: Build leverage. You do this by leveraging 3 things: Time, Money, and Energy

- i) Income Producing Assets: Such as owning your own online business, which gives you leverage as it's running 24/7 working online to make you income. When you join the Prospria™ home based business opportunity, you'll get your own website, running 24/7/365. It's leveraging time, as even while you're sleeping, it's working to make sales online and make you money. Sort of like an online vending machine. You wake up in the morning, check your emails, and see that you got a sale alert from Prospria™ letting you know that your business made a sale, earning you \$2500. Again it's like having your very own online vending machine. Whatever you're doing, where ever you are, your new online business just keeps working, giving you massive leverage in your ability to earn income 24/7/365 automatically. Which is what you need if you want to get rich in life.
- ii) Borrowing to invest. People do this all the time. One very popular form of this is a mortgage on a house. You've borrowed the money, but it's invested in a home that's being paid down. But there's other ways to do this. For example if you can borrow some smaller amount either from: a friend, a relative, short term loan from a bank or lending company, cashing in a low yield investment or bank savings, or borrow on a credit card. Then simply investing that money into a business that can start to make you money. So if you can borrow the funds and then use those funds to get into business, often the payout is well worth the risk, simply because trying to save up enough to eventually use for trying a new venture will take too long. Borrowing it can

save you a lot of valuable time. The faster solution is to just borrow the funds and get into business now. Then just work hard on that business to make enough money to quickly pay off your business loan. Really most people are already familiar with things like Student loans, Mortgages, Car Loans, etc. So why not get a loan for a business which can actually start to make you money. So if you're thinking of getting involved with the Prospria™ home based business opportunity <https://www.prospria.com>, but maybe don't have the funds right now, — one option you do have is to seek out a loan. Maybe from a friend or family member. Or just put it on a credit card and then pay it off later once you start to make some sales. That way you can get started immediately.

- iii) Build a team. As mentioned before. The more people you have helping you with almost any task you can think of, the more easier and quicker it can get done. This is particularly true when it comes to sales. By having a team of sales people that are working for you, running around doing the sales. And then whenever one of your team makes a sale, you earn a commission off their work; you're leveraging both time and efforts (energy). So with the Prospria™ home based business opportunity at our website: <https://www.prospria.com> allowing you to build your own sales force. As you begin to recruit others into the business, they become part of your team. Each time someone on your team makes a sale, you earn 50% of the profits. If you build a large enough team, with each of them making sales, your profits can skyrocket! We designed it this way to allow our members to maximize this principle of leveraging other people's time and efforts, which is key to building wealth.

Final Thoughts:

I hope this has given you some new insights. Becoming an online business owner is a very exciting and profitable endeavor. The internet offers the most practical way for the average person to own and operate a small online business. Plus it offers tremendous benefits in so many different ways. Benefits such as:

- Websites are open 24 hours a day. You can make sales night and day, anytime, 24/7/365 (compared to just regular 9am to 6pm office or store hours)
- An ecommerce website is like an online vending machine. It does the selling for you, takes the payment for you, fulfills the order automatically. And Completing sales automatically without you having to physically be there.
- Low overhead to own the business and operate an online business. Own an online business typically for under \$10,000 usd. Very affordable. (compare that to your typical Subway Sandwich franchise in the United States is between \$116,600 and \$263,150 USD to open.)
- Earning US dollars — A great deal of ecommerce is done in US dollars. So you earn USD amounts.

- Operate your business with simply a laptop or even a smartphone from anywhere in the world (even while you travel).
- No inventory storage or expiring inventory if you're selling digital products, such as online memberships.
- Often no employees are required. So no staffing to worry about. (again your website is like an online vending machine)
- Recession proof and pandemic proof. Plus your online business is safe from things like: fires, theft, pests, vandalism, acts of God (ie: hurricanes, floods, earthquakes, tornado's, etc etc). All of which regularly affect brick and mortar businesses. Sometimes with devastating effect. Online businesses don't have to worry about those issues hardly at all.
- Sell to a world wide customer base of billions of people (instead of just a local town, city, or neighbourhood)
- And really the list of benefits to owning your own online business is huge! An online business is certainly a very good option to consider start your next business.
